

TECHNICAL CHARACTERISTICS

SPECIFICATION: N/A

APPLICATION: This 3-ply hose is widely used for irrigation and washing in parks and other leisure facilities; factories and at home. The light, colourful, flexible hose has excellent resistance to hard weather conditions. Yellow water hose is thicker than the green garden hose, giving it a higher working pressure, better abrasion resistance and longer service life.

TUBE: An inner layer of germproof PVC prevents the production of fungus or moss even when not used for long periods.

REINFORCEMENT: The middle layer is made with a 24-braid fibre mesh for extra strength to handle high water pressure and flexibility.

COVER: The outer layer is ultraviolet radiation resistant PVC helping prolong the life of the hose when exposed to sunlight. The bright yellow colour gives additional visibility, which is often preferred for use in manufacturing or construction sites.

TEMPERATURE RANGE: -5 degrees C to +65 degrees C

SAFETY FACTOR: 3:1

	I.D	O.D	W.P	W.P	BR	COIL LENGTH
