

TECHNICAL CHARACTERISTICS

DESCRIPTION: The set comprises:

- 30metres of green garden hose
- A seven dial spray gun with soft grip locking handle
- Three plastic fittings with universal connectors

APPLICATION: The 3-ply hose is widely used for irrigation and washing at home and in leisure facilities and factories. The light, colourful, flexible hose has excellent resistance to hard weather conditions, making it the ideal product for garden irrigation. The fittings and spray gun use universal connectors to make assembly and use straightforward. The spray gun has a wide range of patterns from fine to heavy jet to meet all requirements.

MATERIAL: The hose has an inner layer of germproof PVC, a middle layer with a fibre mesh for extra strength and flexibility and an outer layer of UV-resistant PVC to help prolong the life of the hose in outdoor use. The fittings are made from strong and durable plastic. The spray gun has a soft grip locking handle for comfort and support.

UNIT WEIGHT: 2.95kg

WORKING PRESSURE: Suitable for water pressure of up to 4BAR, sufficient for standard domestic mains pressure.

PACKAGING: Shrink-wrapped together and bar-coded as a single unit
