

## TECHNICAL CHARACTERISTICS

**SPECIFICATION:** N/A

**APPLICATION:** The foot valves should be fitted to the suction side of a fluid pump to prevent foreign matter entering the pump. They are typically used to move water from open and closed sources such as ponds and tanks for irrigation and flood alleviation. The valve is a push-fit and should be secured with a hose clip or clamp. The foot valve can easily be removed and cleaned and refitted.

**MATERIAL:** The foot valves are made from PP plastic.

**COLOUR:** White

**PACKAGING:** All foot valves are individually bagged and packed in boxes.

**MINIMUM ORDER QUANTITY:** 5 units
